RETRO WOOD PLANKS

Step 1

Layout the Panel

Layout is not necessary because all you need to do is to start from the centre of the wall and work your way out.

Step 3

Cut the Panel using Scissors

Wall panels look very realistic. However, they can be easily cut by first drawing a line on the back then using a pair of large scissors. They can also be cut using a multi-tool fitted with a fine-tooth blade.

Step 5

Alignment and Positioning

at the same time, allowing it to be slid sideways for alignment and positioning. No tape is necessary

Step 2

Create a start Line

To find the centre of the room you would measure all four walls, find the centre of all four walls and then connect two opposite facing walls with a chalk line.

Step 3

Glue the panel

Glue Panel in place using a High-Tack Adhesive. These decorative Wall panel are very lightweight and are put up with a high-tack, water based adhesive that immediately holds the tiles in contact with the Wall.
